Summary

I am a Senior AI Research Scientist at Autodesk Research, working on multimodal deep learning for 3D generative modeling and design. I received my Ph.D. in Computer Science from the University of Mannheim with highest distinction, where my research focused on the limitations of large language models in resource-constrained multimodal and multilingual settings. In particular, I investigated how vision-language models (VLMs) can synthesize programs that compile to visual media, a direction known as graphics program synthesis. I also have experience with pre-training token-free language models for style-conditioned poetry generation and developing unsupervised evaluation metrics for machine translation.

Experience

Autodesk Research	London, United Kingdom
SENIOR AI RESEARCH SCIENTIST	May 2026 - Present
• Researching multimodal deep learning and reinforcement learning for 3D generative modelling and design.	
Adobe Research	Lyon, France
AI RESEARCH SCIENTIST INTERN	Apr. 2025 - Sep. 2025
• Synthesized photo-realistic appearances of 3D objects using VLMs and procedural generation.	
National Institute of Information and Communications Technology (NICT)	Kyoto, Japan
AI RESEARCH SCIENTIST INTERN	Aug. 2024 - Mar. 2025
• Developed a novel VLM architecture enabling zero-shot synthesis of scientific vector graphics from text descriptions.	

Higher Education

University of Mannheim & Bielefeld University	Mannheim & Bielefeld, Germany
PH.D. IN COMPUTER SCIENCE	May 2022 - May 2026
• Graduated with highest distinction (summa cum laude).	
• Worked on graphics program synthesis and multilingual natural language processing.	
• Thesis title: Multimodal and Multilingual Language Modeling under Resource Constraints.	
Darmstadt University of Technology	Darmstadt, Germany
M.SC. IN COMPUTER SCIENCE WITH MINOR IN ELECTRICAL ENGINEERING	Apr. 2019 - Oct. 2021
• Graduated with honors.	
• Focus on natural language processing and machine learning.	
• Thesis title: Self-Learning for Unsupervised Evaluation Metrics.	
– Third place in university-wide thesis competition.	
Darmstadt University of Technology	Darmstadt, Germany
B.SC. IN COMPUTER SCIENCE	Oct. 2016 - Mar. 2019
• Thesis title: Text Generation from Knowledge Bases.	

Awards

HONORS & RECOGNITIONS

2023	ACL Best Paper Honorable Mention , Proceedings of the 61st Annual Meeting of the Association for Computational Linguistics	Toronto, Canada
2023	EACL Outstanding Paper Award , Proceedings of the 17th Conference of the European Chapter of the Association for Computational Linguistics	Dubrovnik, Croatia

GRANTS & SCHOLARSHIPS

2024	NICT Research Fellowship , Financial support to facilitate international research collaborations.	Project funding
2024	Google Cloud Platform Credit Award , Financial aid for selected academic research projects.	Project funding
2020	PROMOS , Scholarship for students completing academic stays abroad.	Monthly grant
2019	Deutschlandstipendium , Scholarship for high-achieving and committed students from all over the world.	Monthly grant

Skills

RESEARCH

Expertise Multimodal Learning, Generative AI, Vision-Language Models, 2D/3D Computer Graphics, Reinforcement Learning
Reviewing NeurIPS, ICLR, ICCV, BMVC, CHI, ACL Rolling Review (ARR)

TECHNOLOGIES

Programming Python, C, C++, Bash, Lua
Machine Learning PyTorch, HuggingFace (Transformers, Datasets, PEFT, Accelerate), DeepSpeed, Comet
Infrastructure Git, Linux, Docker, Slurm, Ray

OPEN-SOURCE PROJECTS

DeTikZify Automated synthesis of graphics programs for scientific figures and sketches.
AutomaTikZ Automated synthesis of scientific vector graphics using text captions.
DaTikZ Dataset of scientific vector graphics for training generative models.
pantran.nvim Plugin that provides machine translation functionality within the Neovim text editor.
uniformers Library for token-free, character-level language modeling.
umetrics Library for experimenting with reference-free evaluation metrics for machine translation.

Selected Publications

CONFERENCE PROCEEDINGS

MultiMat: Multimodal Program Synthesis for Procedural Materials using Large Multimodal Models
Jonas Belouadi, Tamy Boubekeur, Adrien Kaiser
The Fourteenth International Conference on Learning Representations, 2026, Rio de Janeiro, Brazil

TikZero: Zero-Shot Text-Guided Graphics Program Synthesis
Jonas Belouadi, Eddy Ilg, Margret Keuper, Hideki Tanaka, Masao Utiyama, Raj Dabre, Steffen Eger, Simone Paolo Ponzetto
Proceedings of the IEEE/CVF International Conference on Computer Vision, 2025, Honolulu, Hawaii

DeTikZify: Synthesizing Graphics Programs for Scientific Figures and Sketches with TikZ
Jonas Belouadi, Simone Paolo Ponzetto, Steffen Eger
The Thirty-eighth Annual Conference on Neural Information Processing Systems, 2024, Vancouver, Canada

AutomaTikZ: Text-Guided Synthesis of Scientific Vector Graphics with TikZ
Jonas Belouadi, Anne Lauscher, Steffen Eger
The Twelfth International Conference on Learning Representations, 2024, Vienna, Austria

ByGPT5: End-to-End Style-conditioned Poetry Generation with Token-free Language Models
Jonas Belouadi, Steffen Eger
Proceedings of the 61st Annual Meeting of the Association for Computational Linguistics, 2023, Toronto, Canada

UScore: An Effective Approach to Fully Unsupervised Evaluation Metrics for Machine Translation
Jonas Belouadi, Steffen Eger
Proceedings of the 17th Conference of the European Chapter of the Association for Computational Linguistics, 2023, Dubrovnik, Croatia

SciImage: How Good are Multimodal Large Language Models at Scientific Text-to-Image Generation?
Leixin Zhang, Steffen Eger, Yinjie Cheng, Weihe Zhai, **Jonas Belouadi**, Fahimeh Moafian, Zhixue Zhao
The Thirteenth International Conference on Learning Representations, 2025

Reproducibility Issues for BERT-based Evaluation Metrics
Yanran Chen, **Jonas Belouadi**, Steffen Eger
Proceedings of the 2022 Conference on Empirical Methods in Natural Language Processing, 2022, Abu Dhabi, United Arab Emirates

JOURNAL ARTICLES

ChatGPT: A Meta-Analysis after 2.5 Months
Christoph Leiter, Ran Zhang, Yanran Chen, **Jonas Belouadi**, Daniil Larionov, Vivian Fresen, Steffen Eger
Machine Learning with Applications (June 2024) p. 100541. Elsevier, 2024

Cross-genre argument mining: Can language models automatically fill in missing discourse markers?
Gil Rocha, Henrique Lopes Cardoso, **Jonas Belouadi**, Steffen Eger
Argument & Computation (Mar. 2024) pp. 3–35. Sage Publishing, 2024
